**SPONSOR:**

**OPPONENTS:**

### REASON FOR LEGISLATION

To establish an Interlocal agreement with the State of Nebraska that formalizes the relationship between the State and City for the exchange of information technology services between the parties, establishes a board for governance, and identifies services currently being provided by both parties for the benefit of the other party.

### DISCUSSION / FINDINGS OF FACT:

The City and State have exchanged technology services for many years, however the arrangement has never been formalized or documented. With the City now relying on the State for something so central as mainframe services, the relationship of the parties should be more formalized with a governing structure in place for this relationship, as well as a provision for termination of the agreement that adequately protects both parties and provides for appropriate compensation for services provided.

**POLICY OR PROGRAM CHANGE:** ☐ Yes ☒ No

**OPERATIONAL IMPACT ASSESSMENT:** None. Things will be better documented regarding how we're currently doing business but this Interlocal by itself will not change how these things are done.
